

Local Building Supplier Discount Packet

2015 BUILD MARBLE FALLS

Single-Family Home Development Incentive Program

By joining with local building supply companies who are offering special pricing, discounts and/or rebates on the purchase of supplies and material for single family home construction, this initiative will create new single family homes in the community and boost our local construction industry, a vital component of the City's economy. Customers must present a copy of the "Single Family Home Building Permit" issued by the City of Marble Falls at the time of purchase to the participating companies for eligibility to receive special pricing, discounts and/or rebates.

The 2015 Build Marble Falls program **waives building permit fees, electrical permit fees, mechanical permit fees, plumbing permit fees, utility water/wastewater tap fees and plan review fees** for the construction of conventional site built single family housing units within the corporate limit of the City of Marble Falls.

For more information contact any of the below entities and reference "Build Marble Falls."
